

Powerful hydraulics

- Removable auxiliary (rear) winch has hydraulic quick disconnects
- For greater productivity and control, multiple pump hydraulic circuit allows simultaneous function
- Piston winch motor provides smooth and precise hoisting
- Main and available auxiliary winch are equally matched in size and performance
- Provisions for the future installation of the auxiliary winch are standard

Total crane operating system

Link-Belt

Link-Belt Pulse is the Link-Belt designed total crane operating system. It includes the rated capacity limiter, boom extend mode controller (EMC), self-diagnostic capabilities and continuous monitoring of multiple crane functions and conditions. To aid operators in a safe and efficient operation, its high-resolution, color-intense graphic display provides excellent contrast even in direct sunlight.

Telematics. You own the data!

Cellular-based data logging and monitoring system that provides:

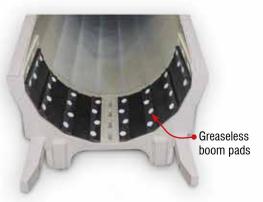

- Viewing options for sharing data with distributor and Link-Belt
- Location and operational settings
- Monitor routine maintenance intervals
- · Crane and engine monitoring
- · Diagnostic and fault codes

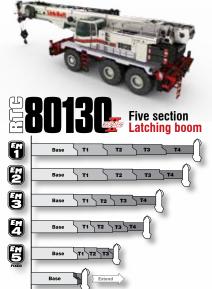

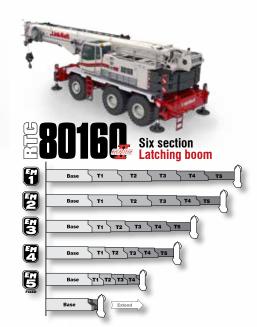

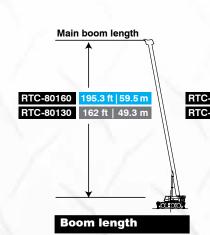

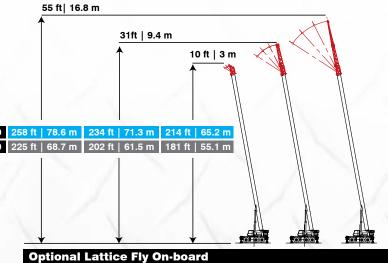

Superior capacities and extension ranges

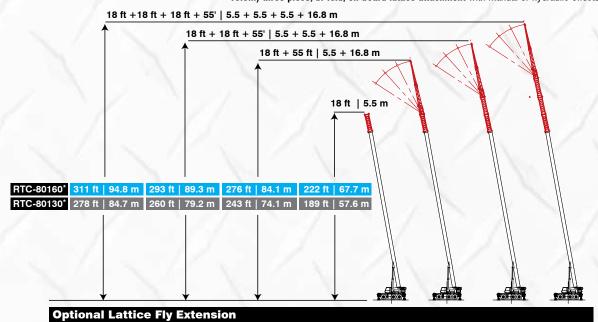

Option 1: 31 ft – 55 ft |9.4-16.8 m two piece, bi-fold, on-board lattice attachment with 2° , 15° , 30° , and 45° manual offsets or hydraulic offsets. Option 2: 10-31-55 ft (3.0-9.4-16.8m) three piece, bi-fold, on-board lattice attachment with manual or hydraulic offsets

^{*}The optional 55 ft (16.8m) two or three-piece offsettable bi-fold fly can be extended by adding up to three optional 18 ft (5.5 m) lattice inserts

Operator's cab provides ergonomic comfort and control

- · Extra large windows throughout for excellent visibility
- Excellent ventilation via a large sliding door, side and rear windows, and hinged roof window
- Single or dual axis, electronic operated controller mounted on armrest for outstanding operator comfort
- Tilting and Telescoping steering column
- All gauges, switches, indicators, and controls are located in the operator's forward line of sight
- · All gauges and switches are backlit for excellent visibility in low light conditions
- · Link-Belt vision package including winch, right side swing, and rear-view cameras
- In cab comfort is maintained by the standard heater and air conditioning
- Cab mounted amber strobe light
- Internal rated capacity limiter light bars
- Available External rated capacity limiter light bars
- · Available LED working light on top of cab

Not only are these cranes easy to get from jobsite to jobsite, they also have extraordinary creep control and jobsite maneuverability, thanks to their hydrostatic powered motors in each wheel. The smaller tires give them an overall height that is ideal for hauling, along with their individual six-wheel hydrostatic drive. There is no crane in the world, any size, that can come close to the job site maneuverability and performance of Link-Belt's large RTC Series II machines.

On the job, Link-Belt's large RTC Series II cranes have outstanding on-tire capacity coupled with a long reach, maneuverability, incredible gradeability and low height, making them truly an ideal solution for industrial sites.

<42 ft (12.8 m) <22 ft (6.7 m)

Because of the innovative 6x6x6 hydrostatic drive/steer on each wheel, the turning radius of the 30' 2" (9.2 m) long carrier is a remarkable

6 wheel steer

2 wheel steer

21' 10" (6.66 m).
